

Coffee Shop Chain

Category of job:

Electrical installation for a coffee shop chain.

Location:

Various locations around Britain.

Project Price:

£35,000 - £55,000

We are delighted to have supported this chain of coffee shops since 2013. We complete the work directly for the client who are quality focused as they own and run the coffee shops. Our brief is to always complete work to a high standard, using quality materials that will provide ongoing reliability.

We complete all testing for this client to maintain their ongoing compliance, their reactive works as they come up, and also full refurbishments of existing or new café's.

Most of these projects will consist of a full strip out and then a complete new installation out of the café. Our work includes new LED lighting, distribution boards, air conditioning supplies, fire alarm and small power.

Our projects are always delivered on time and to an exceptional standard. We have a full fit out starting for this client this year as they continue to expand.
