

## Large Country House

### Category of job:

Residential Refurbishment

### Location:

Wiltshire

### Project Price:

£67,000

Utilising our teams extensive experience of renovation, we installed a full structured network throughout the four floors of this property. Working closely with the clients AV specialist we also installed a new IRS TV system and various AV throughout the property. During this project we built an exceptional relationship with the AV specialist and have since completed other projects together.

The size of the property dictated that a fibre optic back bone was installed to provide the required performance and future redundancy. This was incorporated into our package together with the supply and installation of the network hardware. This included switches, access points and cabinets.

Door and gate access was installed together with POE CCTV. We installed numerous supplies throughout the property to assist other specialist contractors. We installed all required containment for our works and to assist other trades.

**Our work on this project began in 2013 and finished in 2017. During this time we completed substantial amounts of work for the two different main contractors who completed different phases / areas of the property. We also completed a large amount of work directly for the client.**
